

# DESIGN DEPLOY SECURE

YOUR TECHNOLOGY  
PARTNER FOR GROWTH.

BUSINESS PROFILE

# WHO WE ARE

Appsline, a future-driven leader in IT infrastructure and technology solutions, delivers end-to-end digital transformation with precision and excellence. Operating across India, the UAE, and Oman, we build high-performance networks, secure enterprise environments, and empower businesses to operate smarter, faster, and more efficiently in a connected digital world. With a strong technical team and customer-first approach, Appsline provides enterprise-grade IT infrastructure, ELV solutions, cloud services, and managed support to organizations across corporate, healthcare, hospitality, education, and industrial sectors.

The background of the entire page is a digital network visualization. It features a central focus on a network cable with a clear RJ45 connector, which is plugged into a port. The port and the cable's internal components are illuminated with a warm, orange-yellow glow. The rest of the background is a dark blue space filled with glowing orange and white particles, some of which are connected by thin, light blue lines, suggesting a complex network or data flow. The overall aesthetic is futuristic and high-tech.

# VISION

To become a trusted global technology partner delivering innovative, scalable, and secure IT & ELV solutions that empower businesses to achieve excellence.

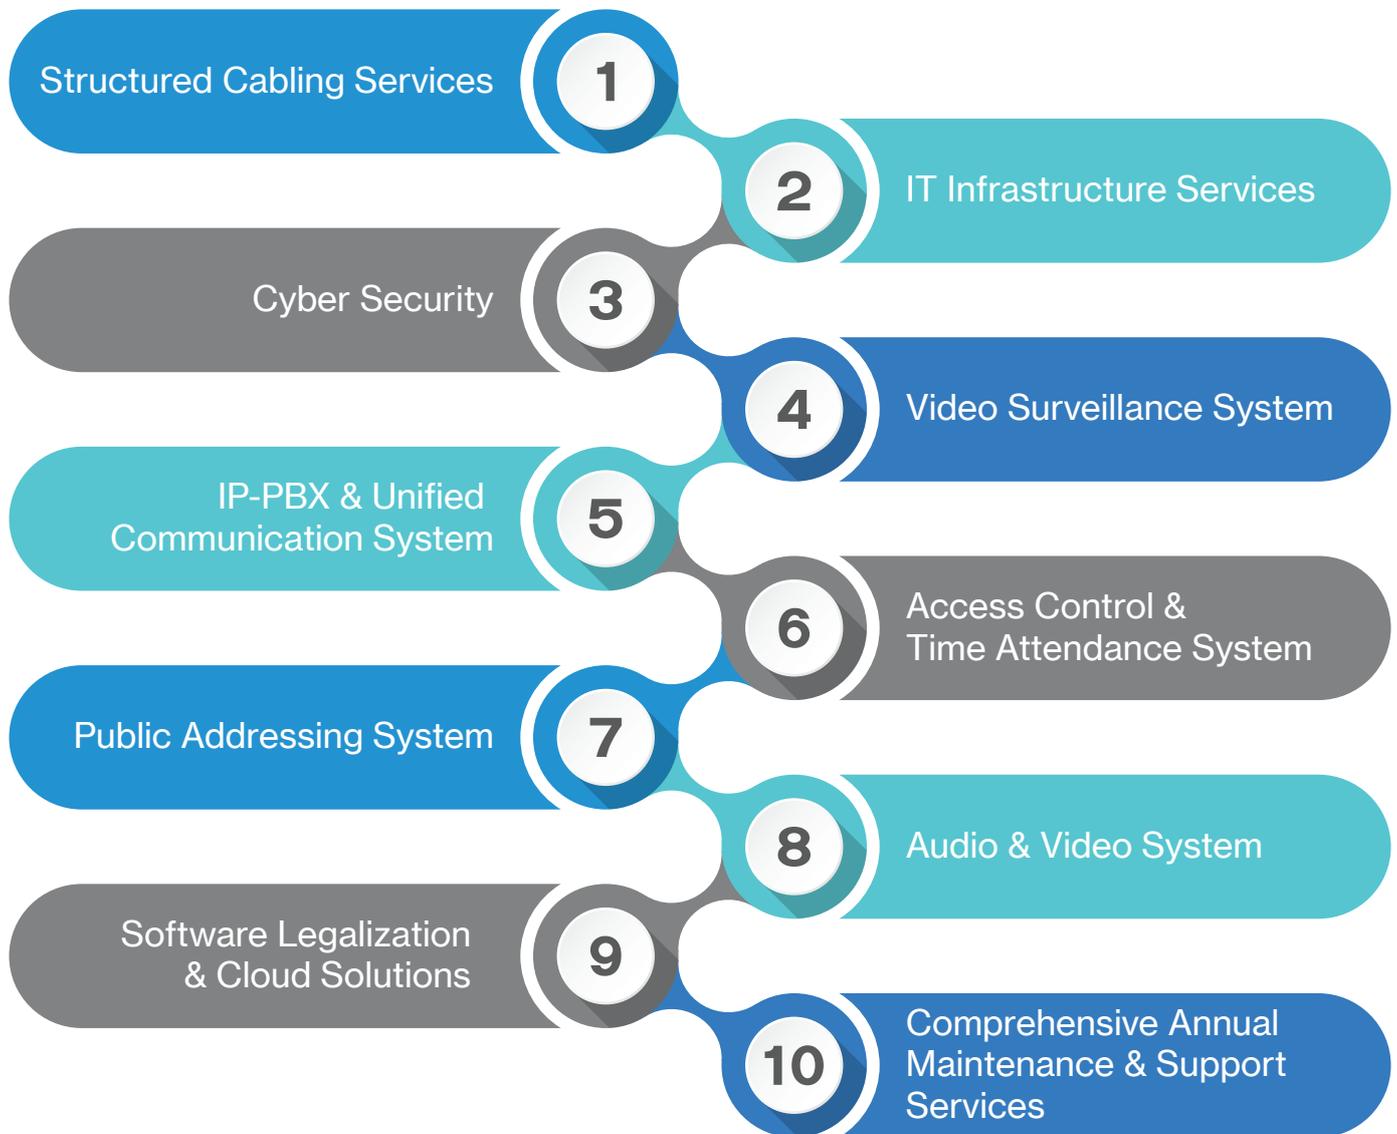

# MISSION

To deliver high-quality IT infrastructure and ELV solutions through innovation and engineering expertise.

To build long-term client partnerships grounded in trust, transparency, and performance. To adopt global best practices that ensure reliable, secure, and future-ready technology environments. To support organizations with continuous service excellence and responsive technical support.

# OUR SERVICES

Appslines offers a comprehensive portfolio of IT infrastructure and ELV services designed to support business operations of all sizes:

# STRUCTURED CABLING SERVICES

Appsline delivers reliable and standards-driven structured cabling solutions that ensure seamless data flow across your organization. Our team designs and implements high-performance copper and fiber cabling systems that support voice, data, surveillance, and building automation networks. We adhere to industry-standard practices for rack management, cable labelling, testing, and certification, ensuring a clean, scalable, and future-ready infrastructure for businesses of all sizes.

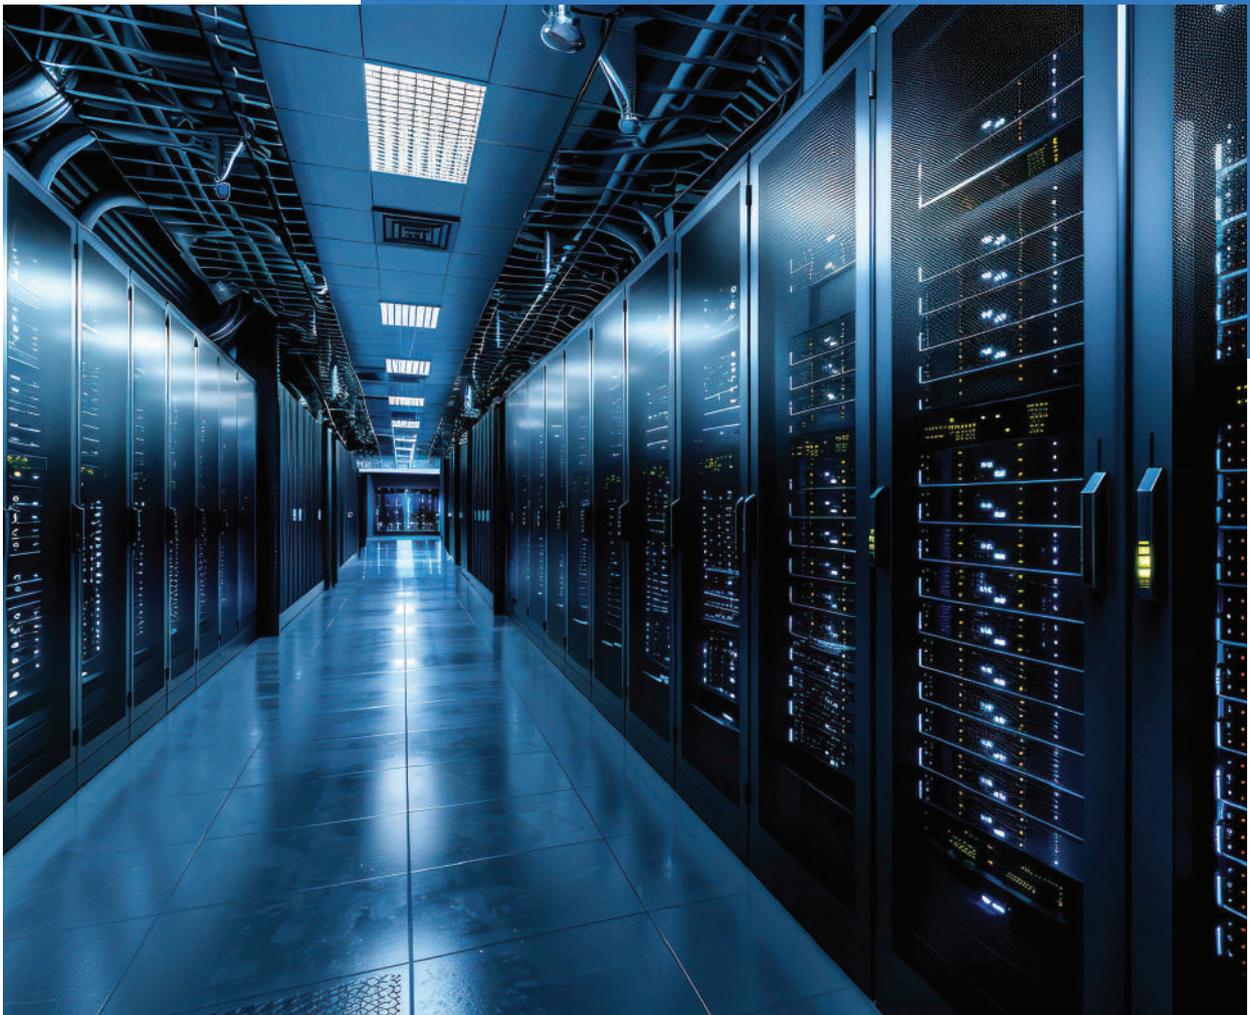

## OUR EXPERTISE INCLUDES

- | CAT6 / CAT6A / CAT7 copper cabling | Single-mode & multi-mode Fiber optic solutions
- | Data center cabling design and implementation | Server room setup & network rack dressing
- | Cable testing, certification & documentation | Patch panel termination & labelling standards

# IT INFRASTRUCTURE SERVICES

We offer end-to-end IT infrastructure solutions designed to enhance productivity, availability, and performance. From deploying advanced switching and routing networks to implementing servers, storage, virtualization, and wireless solutions, Appslines provides a strong technology foundation for your business operations. Our approach focuses on security, scalability, and efficiency – ensuring your IT environment remains robust and ready to support growing organizational demands.

## OUR EXPERTISE INCLUDES

- | Switching, routing, and WAN solutions | Server and storage implementation
- | Virtualization (VMware, HyperV) | Backup & disaster recovery planning
- | Wireless network design & deployment | IT hardware supply & configuration

# CYBER SECURITY SOLUTIONS

Appsline helps organizations strengthen their cyber defense with advanced firewall technologies, intrusion prevention systems, and endpoint protection solutions. Our security framework ensures comprehensive protection against malware, ransomware, unauthorized access, and evolving digital threats. With secure VPN setups, web filtering, email security, and continuous monitoring, we safeguard enterprise networks and ensure business continuity with minimal risk.

## OUR EXPERTISE INCLUDES

- | Next-Generation Firewall deployment | Intrusion detection & prevention
- | Secure VPN & remote access | Web & application filtering | Endpoint protection & EDR solutions
- | Email security & anti-phishing protection | Policy framework & compliance support

# VIDEO SURVEILLANCE SYSTEM

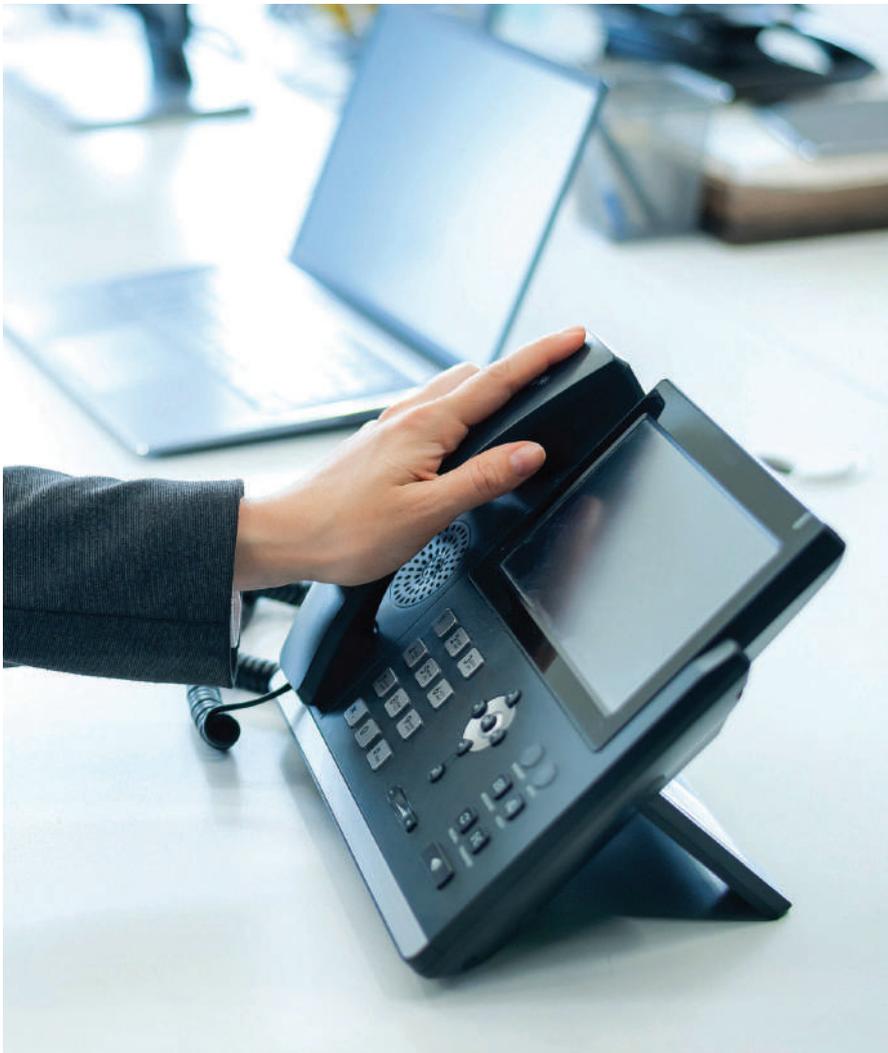

We design and deploy intelligent IP-based video surveillance systems that offer real-time monitoring, advanced analytics, and long-term reliability. Our solutions include high-definition cameras, NVRs, remote access configurations, and AI-assisted features such as motion detection and facial recognition. Appslines ensures seamless integration, clear visibility, and robust storage options – making surveillance more effective for commercial, industrial, and residential environments.

## OUR EXPERTISE INCLUDES

- | IP-based video surveillance design & deployment
- | NVR and storage configuration according to the specifications
- | AI-enabled video analytics | Remote monitoring & mobile access setup
- | Integration with access control & alarm systems | AMCs for multi-site CCTV networks
- | enhanced security for any environment.

# IP-PBX & UNIFIED COMMUNICATION SYSTEM

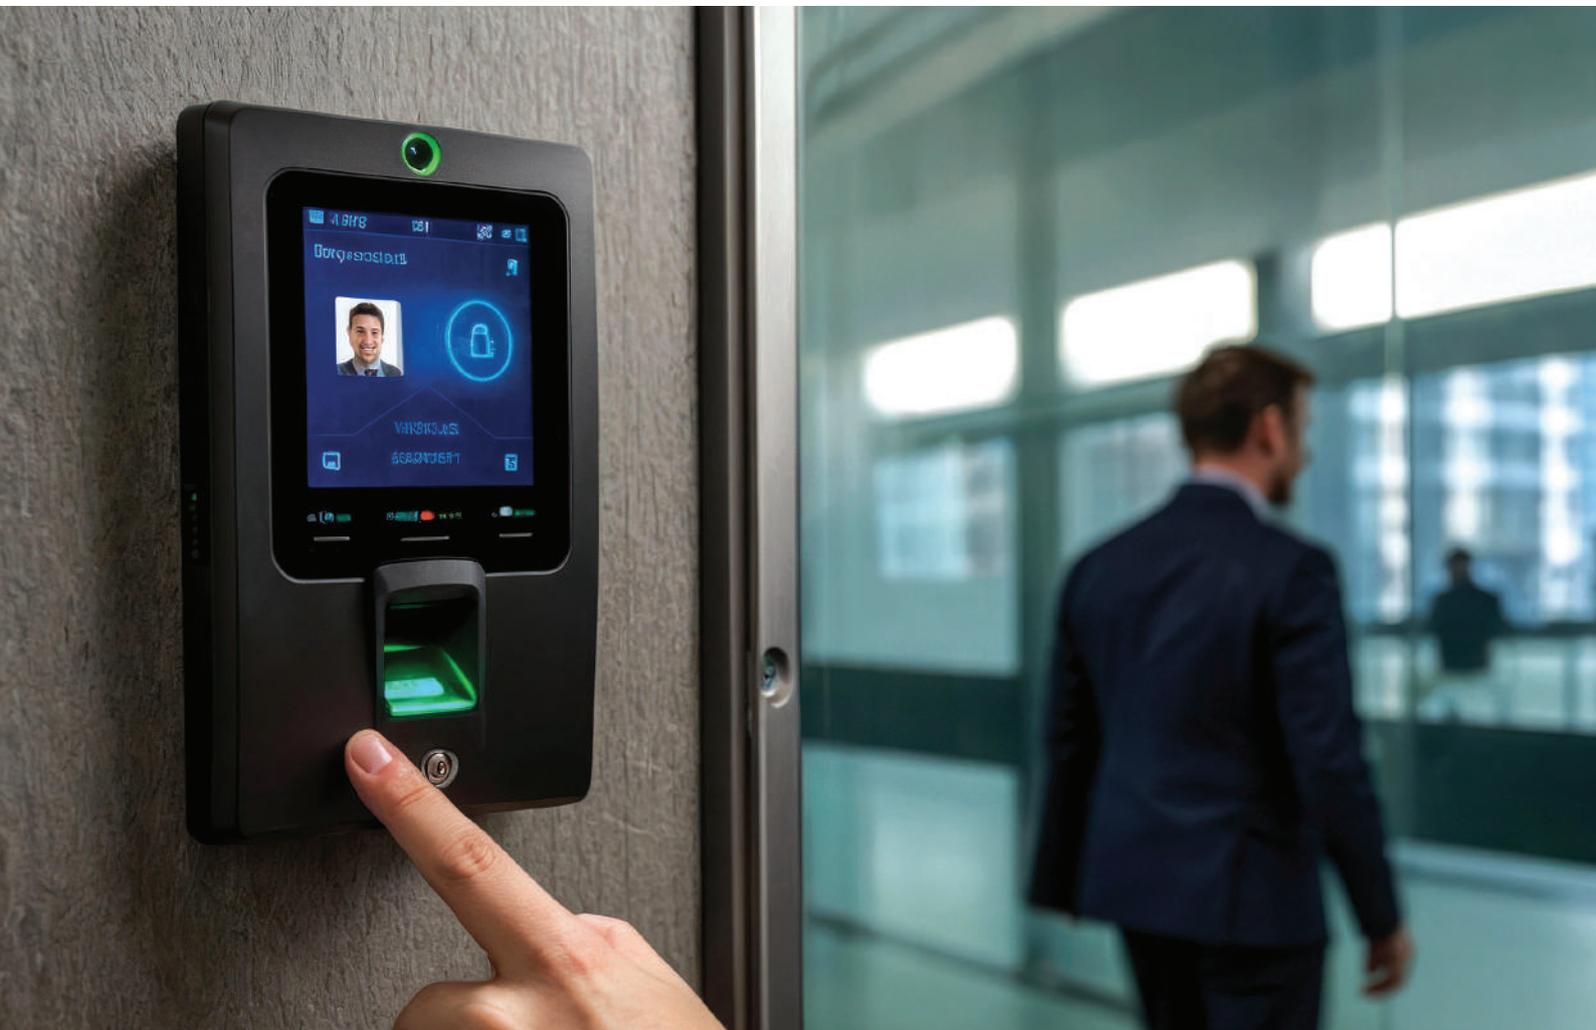

Appslines enables modern communication experiences with feature-rich IP-PBX and unified communication platforms. We deploy advanced VoIP solutions, SIP trunking, call management tools, IVR systems, and multi-location communication integrations. Our unified communication suite enhances collaboration through voice, video, conferencing, and mobility apps – ensuring that businesses stay connected across teams, branches, and remote environments.

## OUR EXPERTISE INCLUDES

- | IP-PBX installation & configuration | VoIP gateway & SIP trunk setup
- | Audio conferencing systems | Call center solutions & IVR design
- | Multi-branch communication integration across the global
- | Unified communication apps for mobile & desktop
- | Call recording, reporting, and analytics for performance and monitoring

# ACCESS CONTROL & TIME ATTENDANCE SYSTEM

We provide secure and efficient access control solutions integrated with advanced biometric, RFID, and facial recognition technologies. Appsline helps businesses manage and monitor staff movement, enforce entry policies, and automate attendance records. Our systems integrate with doors, elevators, HR portals, and payroll platforms – ensuring enhanced security, improved workflow efficiency, and complete traceability across facilities.

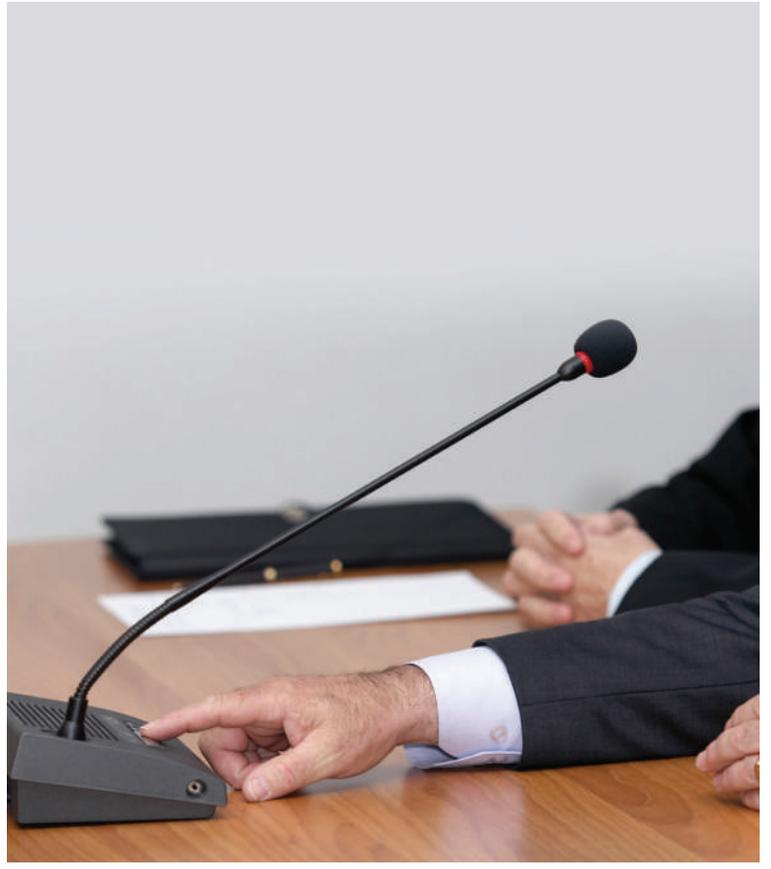

## OUR EXPERTISE INCLUDES

- | RFID & biometric access control | Face recognition attendance systems
- | Elevator & door integration | Multi-level access policies
- | Attendance reports & payroll integration | Cloud-based access management
- | Cloud-based dashboards for real-time access monitoring and centralized control across multiple locations

# PUBLIC ADDRESSING SYSTEM

We provide advanced public addressing systems engineered for crystal-clear audio and efficient emergency notifications. Our solutions support hospitals, hotels, campuses, and commercial establishments where real-time announcements and zone-based communication are critical. For healthcare environments, we offer seamless IP-PBX integration to support medical code announcements in accordance with NABH standards. With IPbased audio distribution and background music capabilities.

## OUR EXPERTISE INCLUDES

- | IP-based PA systems | IP-PBX integration for healthcare institutions | Emergency alert & evacuation systems
- | Zoning & multi-floor audio distribution Background music systems Customizable zone
- | management allowing targeted announcements for specific areas or departments

# AUDIO & VIDEO SYSTEM

We design and implement professional audio and video solutions for meeting rooms, training halls, conference spaces, and auditoriums. Appslane integrates interactive displays, conferencing systems, projectors, digital signage, and high-fidelity sound systems to create immersive experiences. Our AV solutions enhance presentations, collaboration, and communication – ensuring seamless operation with centralized control and userfriendly interfaces.

## OUR EXPERTISE INCLUDES

- | Interactive displays & smart meeting rooms | Video wall and digital podium integration
- | Projectors & video conferencing systems | Digital signage solutions
- | Chairman and delegates conference system
- | Auditorium sound & lighting design | AV control system integration

A man in a dark suit and tie is shown from the chest up, holding a glowing digital cloud network in his hands. The network consists of a central cloud icon surrounded by various icons (like a clock, a document, and a gear) and connected by a web of lines and nodes. The background is a dark blue with a cityscape and digital light effects.

# SOFTWARE LEGALIZATION & CLOUD SOLUTIONS

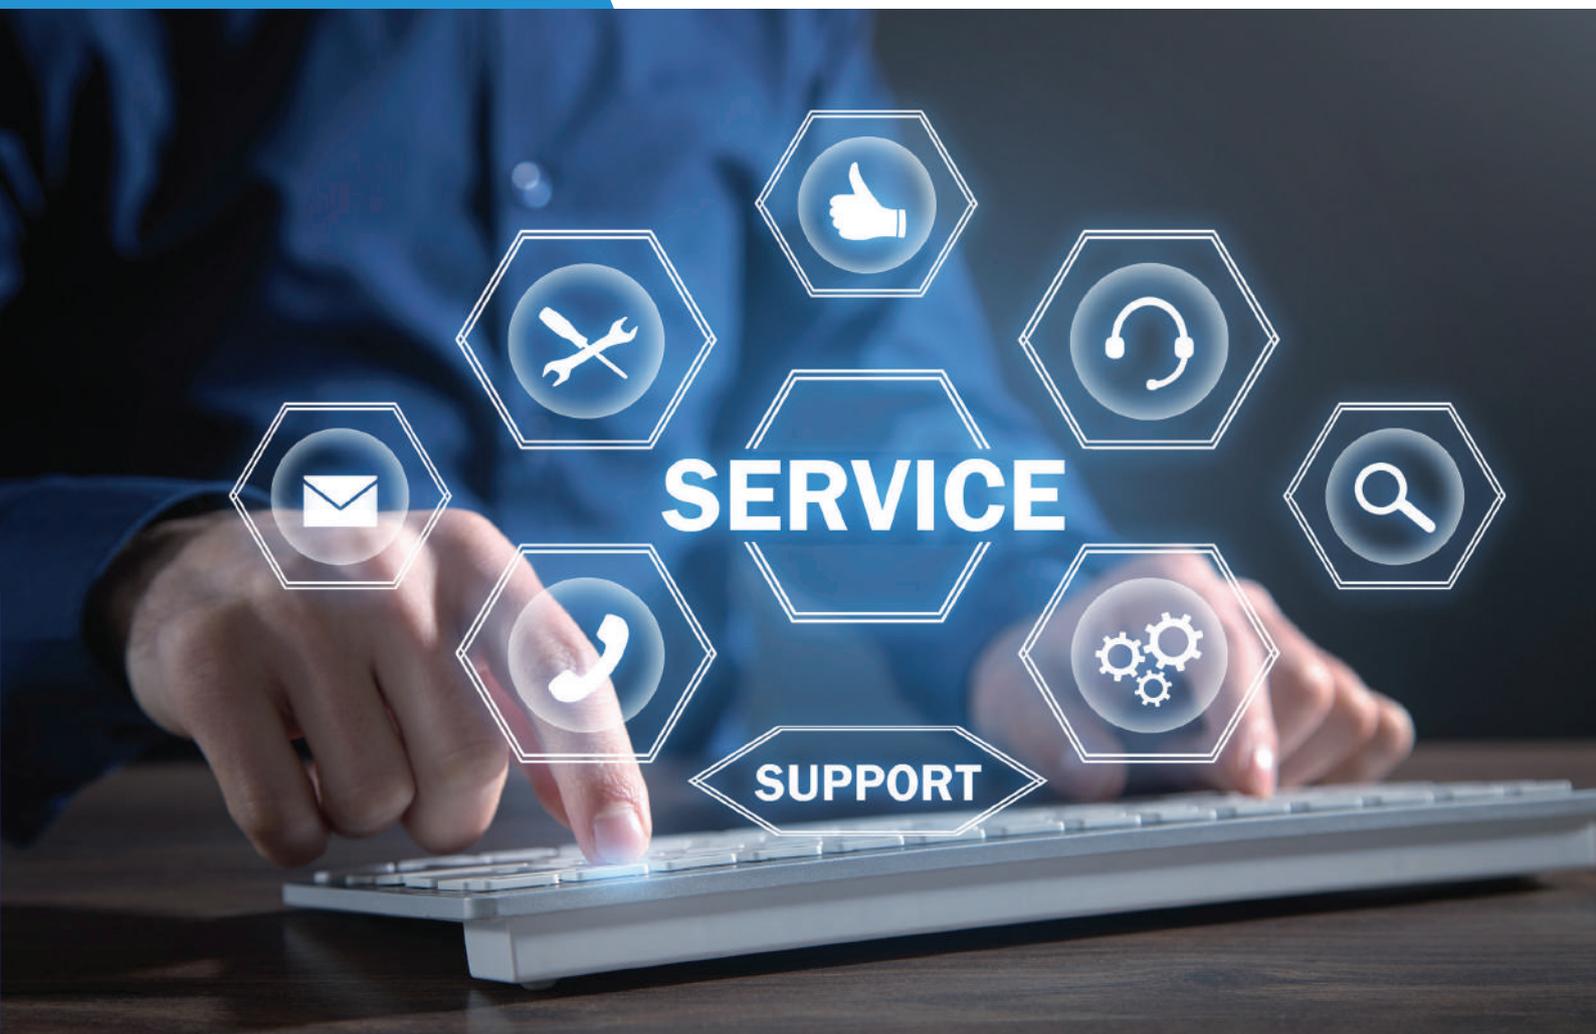

Appslines assists organizations in adopting licensed software and secure cloud platforms that ensure compliance, stability, and performance. We provide Microsoft licensing, cloud migrations, data backup, tenant security enhancements, and Azure-based infrastructure solutions. Our approach helps businesses reduce risks associated with piracy, streamline operations, and modernize their IT landscape with a reliable cloud-first strategy.

## OUR EXPERTISE INCLUDES

- | Microsoft licensing (O365, M365, Server, CALs)
- | Azure cloud services | Microsoft SQL Server Licensing
- | Cloud migration & backup solutions | Anti-piracy compliance audits
- | Software standardization & asset management
- | Red Hat Enterprise Linux (RHEL) Subscription Management & Renewal Services

# COMPREHENSIVE ANNUAL MAINTENANCE & SUPPORT SERVICES

We offer comprehensive AMC and managed support services that keep IT infrastructure running smoothly throughout the year. Appslines provides proactive maintenance, on-site and remote troubleshooting, preventive health checks, security patching, and continuous monitoring of critical systems. With SLA-driven response and dedicated technical expertise, we ensure maximum uptime, reduced disruptions, and complete peace of mind for our clients.

## OUR EXPERTISE INCLUDES

On-site & remote technical support

- | Preventive maintenance visits | Server, firewall & network monitoring
- | Backup verification & security patching | Multi-site AMC management
- | Quick SLA-based responsetimes | Preventive and corrective
- | maintenance for all IT and ELV equipment

# APPSLINE SUPPORT PORTAL YOUR DIRECT LINE TO FASTER ASSISTANCE

Our dedicated Support Portal – [www.support.appslines.in](http://www.support.appslines.in) ensures customers receive quick, organized, and transparent assistance for both sales and technical needs. With an easy callback request system and a clearly defined escalation matrix, you can track every request with confidence. The portal enhances communication, minimizes delays, and delivers a smooth support experience – because your uptime and satisfaction are our priority.

## OUR EXPERTISE INCLUDES

### INSTANT CALL-BACK REQUESTS

Customers can raise sales or technical requests in seconds, ensuring quick attention from the Appslines team.

### MULTI-LEVEL NOTIFICATIONS

Each request triggers multiple internal notifications, ensuring the right team members are alerted without delay.

### REAL-TIME STATUS UPDATES

Customers receive notifications at every stage of progress, bringing full clarity and transparency to the support process.

# WHY CHOOSE APPSLINE?

## Your Trusted Technology Partner

Your business deserves a partner who understands technology and delivers results with consistency. Appslines stands out by offering dependable solutions backed by proven experience and dedicated support.

### Quality

Based in India with a presence in the UAE & Oman

Highly skilled and certified technical team

End-to-end IT & ELV solutions under one roof

Quality-driven engineering and global best practices

Strong customer support with a quick response time

Customized solutions for each industry

Reliable post-implementation maintenance & AMC

Transparent communication and competitive pricing

Proven track record with multi-sector clients
